## **Student Satisfaction Survey (2018-19) (A Report)**

### **Introduction:**

As per the instruction of the NAAC (National Assessment and Accreditation Council), Student Satisfaction Survey Committee (SSSC) has conducted a survey through a questionnaire provided by the NAAC itself. The questionnaire consists of twenty questions on the various facets of teaching learning process. The questions range from the teaching skills of teachers like subject knowledge, communication skills, class preparation, and use of ICT tools, to their overall approach to the educational process. The given questionnaire also focuses on the overall approach of the faculty and the institution with respect to providing right environment, motivation, interpersonal relationships, feedback etc. Thus, the survey seeks to assess the satisfaction level of the students regarding the whole teaching learning process. The questionnaire concludes with three open-ended suggestions to give students the opportunity to put into their own words what they believe to be the best things that GNC has to offer, what GNC needs to improve in order to provide quality educational services, and any additional comments about their experiences at GNC.

### **Methodology:**

The questionnaire is based on the Likert scale where the responses are recorded on a scale of 0 to 4, with the most positive response being rated as 4 and the most negative response being rated as 0. For the session 2018-19, the given questionnaire is filled by 350 students selected randomly from UG & PG classes. After the survey, the mean score for each question has been calculated and then the overall mean has been arrived at.

#### **A) Method for calculation of mean on Likert Scale:**

To determine the minimum and maximum length of the 5-point Likert scale, the range is calculated by  $(4 - 0 = 4)$  then divided by 5 to find five equal intervals  $(4 \div 5 = 0.80)$ . Further, mid value is calculated by taking average of upper and lower limits of class interval. Thus, the intervals are as follows:

Likert Scale	Class Interval	Mid-value
0	0-0.8	0.4
1	0.8-1.6	1.205
2	1.6-2.4	2.005
3	2.4-3.2	2.805
4	3.2-4	3.605

## B) Sample Detail of the Survey:

Total number of students selected (UG & PG): 278 +72 = 350

**Key Findings of the Survey:**

The results of the survey can be broadly divided into two categories:

Parameters below 3 on Likert Scale	Parameters 3 and above on Likert Scale
1. Teacher’s approach to teaching (2.84)	1. Syllabus covered in the class (3.16)
2. Discussion on student performance in assignments (2.82)	2. Teachers’ preparation for the class (3.02)
3. Interest of the institute in promoting internship, student exchange, field visit (2.51)	3. Ability of teachers to communicate (3.25)
4. Teaching and mentoring process facilitated in	4. Fairness of the internal evaluation process (3.07)

cognitive, social and emotional growth (2.66)	
5. Institute provides multiple opportunities to learn and grow (2.86)	5. Follow up by the teacher with an assigned task (3.04)
6. Expected competencies, course outcomes and programme outcomes informed by teachers (2.94)	6. Illustration of the concepts through examples and applications by the teachers (3.21)
7. Identification of the student's strength and encouragement by the teacher (2.95)	7. Encouragement by the teacher to participate in extracurricular activities (3.06)
8. Identification of the student's weakness and helping them (2.83)	
9. Efforts made by the institute in improvement of the teaching learning process (2.82)	
10. Usage of student centric methods by the teachers to enhance learning experiences (2.90)	
11. Efforts made by the teachers to inculcate soft skills, life skills and employability skills	

in the students (2.65)	
12.Usage of ICT based tools while teaching (2.06)	
13. Overall quality of teaching learning process (2.92)	

As the overall mean of the survey is 2.88 on a Likert scale, it implies that chiefly the students are satisfied with the teaching learning process. At the same time, it also conveys that the institute can still enhance its performance by focussing on the parameters which are below 3 on the Likert scale to increase the level of student satisfaction.

### **Suggestions by the Committee:**

- As per the survey, the parameter showing the usage of ICT tools has the lowest range on Likert scale i.e. 2.06. So, the college may focus on how to enhance the usage of various ICT tools available in the campus.
- To impart practical knowledge to the students, more educational visits, field visits and tours may be organised. Student satisfaction can be further enhanced by improving the functioning of Placement cell (w.r.t. Q. No. 7, Mean Value: 2.51).
- As per the suggestions and comments of the students, the college needs to focus on the availability of First Aid in the campus, RO problem and Common room. Amendments should also be made in the process of calculating different type of fines.
